This Package of End-Conditioned Studs was Produced by Elk Lumber Company, Medford, Oregon

For over a year the Irvington 62 installation at Elk Lumber Company has been producing end-conditioned studs, fully identified on the ends with the mill's trademark and stud-length. Irvington end-conditioned studs enjoy a decided sales advantage in today's competitive market, where a public that is conscious of product-identification naturally chooses familiar brand-names identified with quality.

SPECIFICATIONS

- Net length of cut: Minimum 4½ feet; nominal maximums: 8, 9, 10 feet.
- Overall dimension (9-ft. machine: 14 feet).
- One adjustable, one movable skid. (Left and right hand models available).
- Calibrated system for accurate set to 1/64-inch.
- Anti-friction type bearings throughout.
- Motorized saw arbors, 7½ H.P. (Adjustable for both saw wear and lead).
- Choice of gear head or 3-to-1 Varidrive with remote pushbutton control.
- Printer mounted on slide plate with spring adjusting screw to compensate for discrepancies in board length.
- Automatic feeder optional.

Specifications may be changed without notice.
